## How Does Missouri Compare in...

<p><b>Drunk Driving:</b> In Missouri 34% of traffic fatalities result from alcohol impairment compared to a national average of 32%. The National Highway Traffic Safety Administration estimates that about 350 individuals lose their lives annually on Missouri roadways due to drunk driving.<sup>1</sup></p>	
<p><b>Binge Drinking:</b> Binge drinking is defined as drinking five or more drinks on the same occasion. Over 24% of Missourians age 12 and older engaged in binge drinking in the last month. This peaked in the 18-25 age group with almost 45% reporting bingeing in the last month.<sup>2</sup> The national average for binge drinking is 23%.</p>	
<p><b>Marijuana Use:</b> Marijuana is the second most common substance of abuse (behind alcohol) for those entering treatment in Missouri. An estimated 5.5% of Missourians age 12 and older have used marijuana in the past month.<sup>2</sup> The national average is 5.9%.</p>	
<p><b>Tobacco Use:</b> Almost 34% of Missourians age 12 and older are current tobacco users. 29% use cigarettes while the remainder use smokeless tobacco (i.e., chewing tobacco or snuff), cigars, or pipe tobacco.<sup>2</sup> This compares to a national tobacco use average of 25%.</p>	
<p><b>Prescription drug abuse:</b> Prescription drug abuse is becoming an increasing concern across the country. For those Missourians age 18 to 25, an estimated 12.5% have used pain relievers for nonmedical purposes in the past year. For those 12 and older, the Missouri average is 5% and the national average is 5.1%.<sup>2</sup></p>	
<p><b>Serious psychological distress:</b> Serious psychological distress (SPD) is defined as having a score of 13 or higher on the K6 scale. 13% of Missourians age 18 or older report having had an episode of SPD in the last 30 days. This compares to a national average just below 11%.<sup>2</sup></p>	
<p><b>Major Depressive episode:</b> 8.6% of Missourians age 18 or older have reported a major depressive episode in the last year. This is compared to the national average of 7.3% for the same age group.<sup>2</sup></p>	
<p><b>Bullying:</b> 23% of Missouri high school students report being bullied on school property in the last year. The national average is 20%.<sup>3</sup></p>
